v Graphical Abstracts

Regular papers

P. Cescutti (Trieste, Italy), D. Garozzo (Catania, Italy) and R. Rizzo (Trieste, Italy)

K.R. Holme and A.S. Perlin (Montreal, Canada)

V. Petrović, S. Tomić, D. Ljevaković and J. Tomašić (Zagreb, Croatia)

P.T. Larsson, K. Wickholm and T. Iversen (Stockholm, Sweden)

E. Tarelli (London, UK), X. Lemercinier and S. Wheeler (Potters Bar, UK)

E. Samain, S. Drouillard, A. Heyraud, H. Driguez and R.A. Geremia (Grenoble, France)

I.D. Spiers, C.H. Schwalbe (Birmingham, UK), A.J. Blake (Edinburgh, UK), K.R.H. Solomons and S. Freeman (Manchester, UK)

J.-Y. Le Questel, N. Mouhous-Riou (Nantes, France), B. Boubia, S. Samreth, V. Barberousse (Daix, France) and S. Pérez (Nantes, France)

C. Delay (Montpellier, France), J.A. Gavin (La Laguna, Spain), A. Aumelas, P.-A. Bonnet and C. Roumestand (Montpellier, France)

R. Stenutz, B. Erbing, G. Widmalm (Stockholm, Sweden), P.-E. Jansson (Huddinge, Sweden) and W. Nimmich (Rostock, Germany)

S. Engelmann and R. Schwartz-Albiez (Heidelberg, Germany)

H. Zheng (Xinxiang Henan, People's Republic of China)

Notes

F. Santini, A. Bisio, M. Guerrini and E.A. Yates (Milan, Italy)

H. Stampe Jensen, G. Limberg and C. Pedersen (Lyngby, Denmark)

A.B. Roy and M.J.E. Hewlins (Cardiff, UK)

1 Effect of methylation of β -cyclodextrin on the formation of inclusion complexes with aromatic compounds. An ionspray mass spectrometry investigation

7 Chitosan *N*-sulfate. A water-soluble polyelectrolyte

13 Synthesis of acylated methyl β -D-xylopyranosides and their enzymic deacylations by rabbit serum esterases

19 A CP/MAS ^{13}C NMR investigation of molecular ordering in celluloses

27 Direct preparation of cyclodextrin monophosphates

35 Gram-scale synthesis of recombinant chitoooligosaccharides in *Escherichia coli*

43 Structure of (\pm)-1,2,4,5-di-*O*-cyclohexylidene *myo*-inositol and synthesis of *myo*-inositol 3-phosphate via its phosphorylation with (2*R*,4*S*,5*R*)-2-chloro-3,4-dimethyl-5-phenyl-1,3,2-oxazaphospholidin-2-one

53 The crystal and molecular structures of 4-cyanophenyl 1,5-dithio- β -D-xylopyranoside S-5 oxide and 4-ethyl-2-oxo-2*H*-1-benzopyran-7-yl 5-thio- β -D-xylopyranoside S-5 oxide

67 Isolation and structure elucidation of a highly haemolytic saponin from the Merck saponin extract using high-field gradient-enhanced NMR techniques

79 The structure of the capsular polysaccharide from *Klebsiella* type 52, using the computerised approach CASPER and NMR spectroscopy

85 Differential release of proteoglycans during human B lymphocyte maturation

97 Interaction mechanism in sol–gel transition of alginate solutions by addition of divalent cations

103 Modifications under basic conditions of the minor sequences of heparin containing 2,3 or 2,3,6 sulfated D-glucosamine residues

109 Benzoylation of aldonolactones with benzyl trichloroacetimidate

113 Sulfoquinovose and its aldonic acid: their preparation and oxidation to 2-sulfoacetaldehyde by periodate

119 Book reviews

iii Graphical Abstracts

Regular papers

- V. Martichonok and G.M. Whitesides (Cambridge, MA, USA) 123 Studies on α -sialylation using sialyl donors with an auxiliary 3-thiophenyl group
- S.B. Etcheverry, P.A.M. Williams and E.J. Baran (La Plata, Argentina) 131 Synthesis and characterization of oxovanadium(IV) complexes with saccharides
- M. Masuda and T. Shimizu (Ibaraki, Japan) 139 Non-mesogenic crystal structure of a synthetic 1-D-glucosamide bolaamphiphile
- É. Bozó, S. Boros and J. Kuszmann (Budapest, Hungary) 149 Synthesis of 4-cyanophenyl 4-azido-4-deoxy-1,5-dithio- β -D-xylopyranoside
- C. Blum (Illkirch, France), N. Rehnberg (Perstorp, Sweden), B. Spiess and G. Schlewer (Illkirch, France) 163 Synthesis of optically active *myo*-inositol derivatives starting from phytic acid
- L. Vachoud, N. Zydowicz and A. Domard (Villeurbanne, France) 169 Formation and characterisation of a physical chitin gel
- D. Florea (Bucarest, Romania), E. Maes and G. Strecker (Villeneuve d'Ascq, France) 179 Primary structure of seven sulfated oligosaccharide-alditols released by reductive β -elimination from oviducal mucins of *Rana temporaria*. Characterization of the sequence HSO₃(3) GlcA(β 1-3)Gal
- P. Christakopoulos (Athens, Greece; Gent, Belgium), W. Nerinckx (Gent, Belgium), D. Kekos, B. Macris (Athens, Greece) and M. Claeysens (Gent, Belgium) 191 The alkaline xylanase III from *Fusarium oxysporum* F3 belongs to family F/10
- F. Stingle (Lausanne, Switzerland), J. Lemoine (Villeneuve d'Ascq, France) and J.-R. Neeser (Lausanne, Switzerland) 197 *Lactobacillus helveticus* Lh59 secretes an exopolysaccharide that is identical to the one produced by *Lactobacillus helveticus* TN-4, a presumed spontaneous mutant of *Lactobacillus helveticus* TY1-2
- D.L. Verraest, J.A. Peters (Delft, The Netherlands), H.C. Kuzee, H.W.C. Raaijmakers (Roosendaal, The Netherlands) and H. Van Bakkum (Delft, The Netherlands) 203 Distribution of substituents in *O*-carboxymethyl and *O*-cyanoethyl ethers of inulin
- J. Li and G. Gellerstedt (Stockholm, Sweden) 213 The contribution to kappa number from hexeneuronic acid groups in pulp xylan

Notes

- K. Ogawa, T. Watanabe (Fukushima, Japan), Y. Ikeda and S. Kondo (Tokyo, Japan) 219 A new glycoside, 1D-2-*O*- α -D-galactopyranosyl-*chiro*-inositol from jojoba beans
- H. Ishida, Y. Ito, E. Tanahashi (Gifu, Japan), Y.-T. Li (New Orleans, USA), M. Kiso and A. Hasegawa (Gifu, Japan) 223 Synthesis of 6'-GM2, a regioisomer of ganglioside GM2, for studying the mechanism of action of GM2 activator
- Z. Györgydeák (Debrecen, Hungary), W. Holzer (Wien, Austria) and J. Thiem (Hamburg, Germany) 229 Cyclization reactions of *N*¹-(glycopyranosylamino)guanidines
- G.B. Kok and M. von Itzstein (Parkville, Australia) 237 A regio- and stereo-selective introduction of azide at C-4 of 2,3-unsaturated *N*-acetylneuraminic acids
- I. Molina Pinilla, M. Bueno Martínez and J.A. Galbis (Sevilla, Espagne) 241 Synthesis and condensation reactions of 1-amino-1-deoxy-2,3,4-tri-*O*-methyl-5-*O*-(pentachlorophenoxy)phthaloyl-L-arabinitol
- Z. Hameršak, N. Pavlović, V. Delić and V. Šunjić (Zagreb, Croatia) 245 Regio- and stereo-selectivity in homogeneous catalytic hydrogenation of 2,5-diketo-D-threo-hexonic acid
